

Corporate Overview

December 2nd, 2025

Forward-looking statements

Except for statements of historical fact, this presentation contains forward-looking statements (within the meaning of the federal securities laws) including statements related to future revenue, future earnings, and the success of our product releases, and the benefits and timing of the acquisition of Celestial AI that involve risks and uncertainties. Words such as “anticipates,” “expects,” “intends,” “plans,” “projects,” “believes,” “seeks,” “estimates,” “forecasts,” “targets,” “may,” “can,” “will,” “would” and similar expressions identify such forward-looking statements. These statements are not guarantees of results and should not be considered as an indication of future activity or future performance. Actual events or results may differ materially from those described in this presentation due to a number of risks and uncertainties.

Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict, including those described in the “Risk Factors” section of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and other documents filed by us from time to time with the SEC. Forward-looking statements speak only as of the date they are made. You are cautioned not to put undue reliance on forward-looking statements, and no person assumes any obligation to update or revise any such forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

Company founded

1995

FY25 revenue

\$5.8B

Employees

7,100+

Patents worldwide

10,000+

Global fabless semiconductor supplier

 **Nasdaq -100**

Mission

We develop and deliver semiconductor solutions that **move, store, process** and **secure** the world's data faster and more reliably than anyone else.

Marvell focus: data infrastructure

Marvell data center market opportunity*

*As of Marvell Custom AI Investor Event, June 17, 2025

Source: 650 Group, CignalAI, Dell'Oro, LightCounting, and Marvell estimates

Accelerated computing relies on **Accelerated Infrastructure**

Accelerated infrastructure portfolio for AI data centers

Custom Compute

XPUs, CPUs, DPUs, NICs

Interconnect

PAM, coherent, coherent-lite, and AEC DSPs
PCIe retimers, DCI modules, TIAs, drivers

Network Switching

Switches for scale-up
and scale-out fabrics

Data infrastructure portfolio for communications markets and data center

Compute

Wireless and networking processors

Interconnect

BASE-T and high-speed Ethernet PHYs

Network Switching

Enterprise and industrial Ethernet switches

Security

Hardware security modules (HSMs)
and security processors

Storage

HDD, SSD, and Fibre Channel controllers
Storage and memory accelerators

Essential silicon building blocks

Technology and IP

5nm, 3nm and 2nm platforms

Systems and software

Accelerators

High-speed mixed signal

Foundational IP

Packaging and interconnect

Multi-die integration

Co-packaged optics

In-package memory

Delivering optimized silicon across all end markets

Flexible R&D models to satisfy customer needs

Complete accelerated infrastructure portfolio

Move Store
Process Secure

Custom compute

XPU

CPU

DPU

NIC

Switching

Ethernet switches

Scale-up fabric

Interconnect

PAM4 DSPs

Coherent-lite DSPs

Coherent DSPs

AEC DSPs

COLORZ® DCI modules

Drivers

TIAs

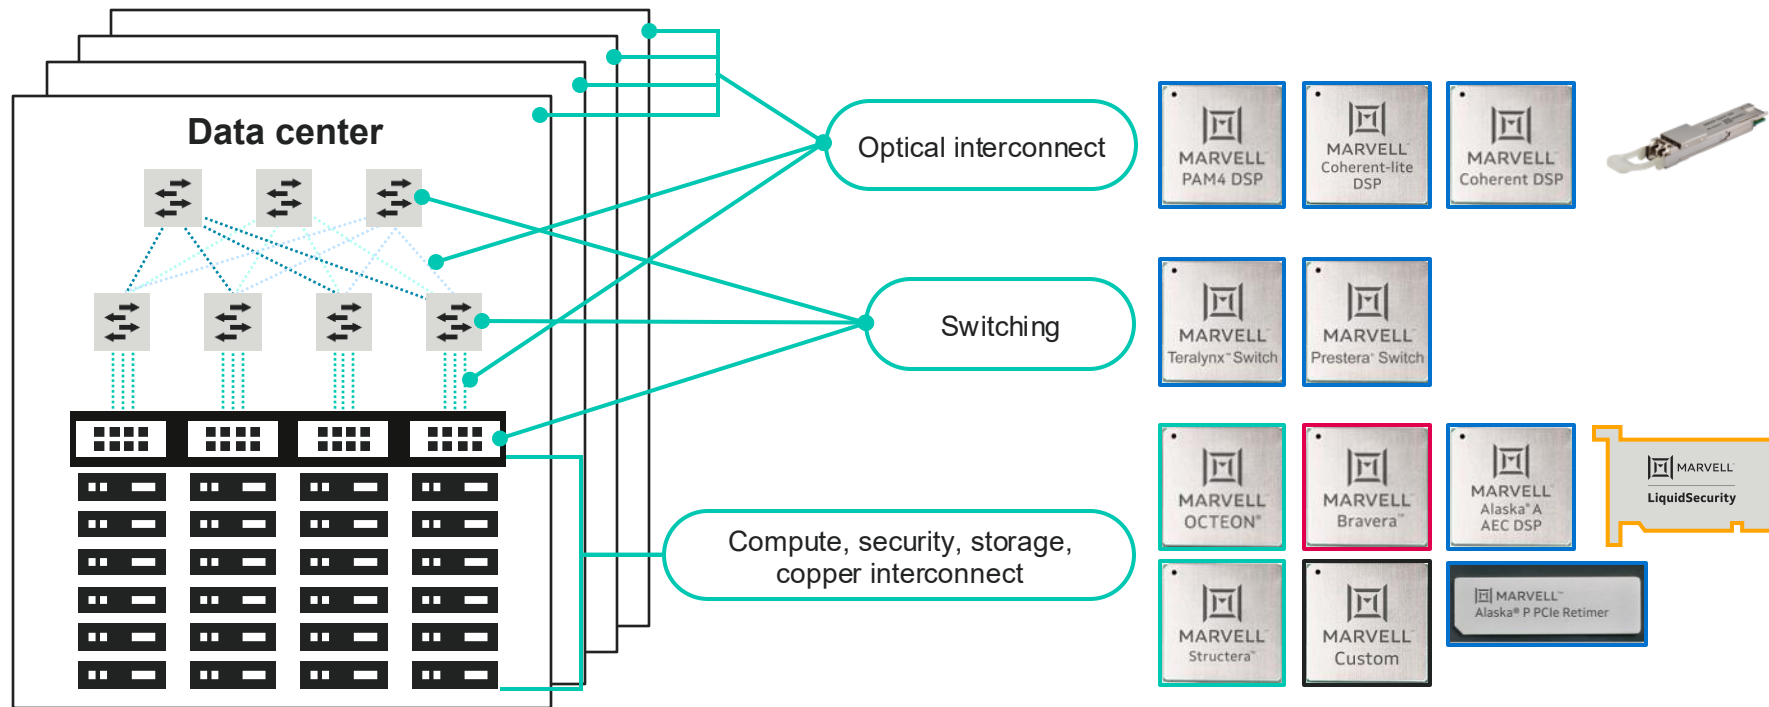

PCIe retimers

Category-leading products for the AI era

General-purpose data center portfolio

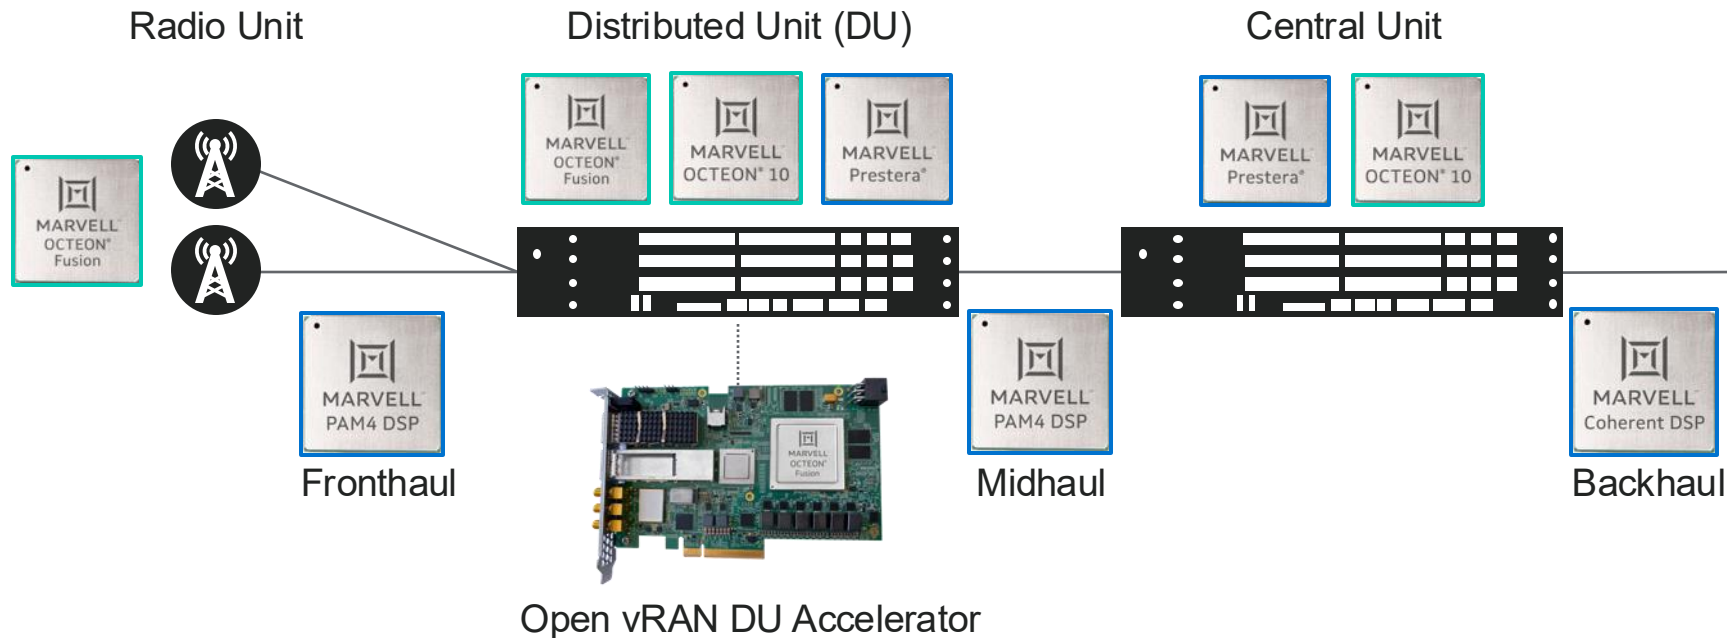

Move Store
Process Secure

Design wins at every major cloud operator

5G carrier infrastructure portfolio

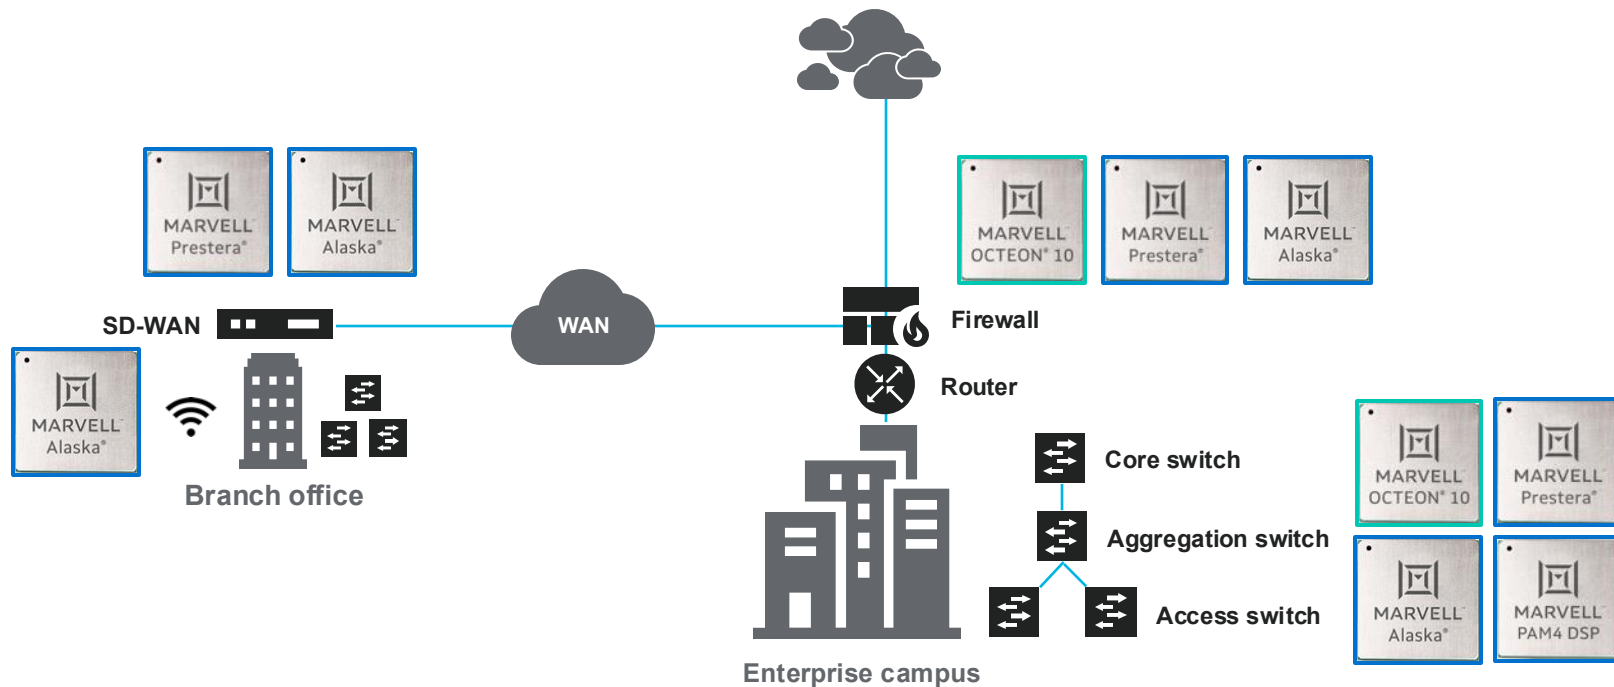

Move Store
Process Secure

Powering traditional RAN and cloud-native deployments

Enterprise networking portfolio

Move Store
Process Secure

Modernizing enterprises for the hybrid world

Global presence

 Corporate offices

Proven leadership team
