"We finished the year with outstanding results and strong momentum," stated Dr. Sehat Sutardja, Marvell's President and CEO. "Our Q4 revenues increased 13% sequentially from the prior quarter, and we continued to strengthen our balance sheet. This has enabled us to continue to aggressively invest in exciting new products while still delivering solid results and generating strong cash flow for the company. During the quarter, we continued to expand our world-class product portfolio by announcing a number of market-leading products including our new 802.11b baseband and RF solution, Libertas(TM), for wireless LAN networking. This two-chip solution is the world's first all-CMOS, lowest power and highest integration wireless LAN solution for the 802.11b market. Marvell also announced the first members of the Presteria(TM) family, the Presteria-MX Ethernet switches, which are the industry's highest performance Ethernet switches to support 10 Gb/s speeds and advanced networking features."

"As we enter the new fiscal year, we are very excited about the strength of our business and our position to capitalize on a number of major product transitions currently underway, including the transition from standalone read channels to integrated system-on-chip solutions, the continued adoption of Gigabit Ethernet and the rapid deployment of wireless LAN networking," concluded Dr. Sutardja.
